**Summary of reasons
for classification:**

The publication entitled *Mother & Daughter* is classified as:
Objectionable.

The publication is a DVD entirely focused on women urinating. All instances of urination are clearly presented in a manner which is designed to be sexually titillating to the viewer. By filming them urinating in this way the publication also degrades the women participants and the close up footage of this activity dehumanises them. The publication therefore validates this conduct as being arousing and part of normal sexual activity. Consequently the publication promotes and supports the use of urine in association with degrading and dehumanising conduct and sexual conduct.

The criteria applied by the Classification Office resulting in the limit on the availability of this publication are prescribed by law. For the reasons given above, this publication is considered to promote and support an activity listed in s3(2) of the Films, Videos, and Publications Classification Act 1993, making the publication objectionable. This classification represents the minimum interference with freedom of expression that is consistent with preventing likely injury to the public good.
